

Brow lamination timings

Your client's hair type and structure will determine how long the Relax Cream is left to process. It's important to remember that if the hair is made up of a mixture of hair types, you choose the shortest processing time. For instance, if the hairs are fine and medium then process for 4 minutes.

Our timing guidelines for the Relax Cream:

Hair type	Timings
Damaged, weak brows	Treatment not recommended
Fine, dry brows	4 minutes
Normal brows	5 minutes
Coarse, thick brows	6 minutes
Pre-treated brows	4 minutes

It is very important to remove Relax Cream thoroughly to avoid over processing as this could cause damage to the brows.

Our timing guidelines for the Reform Cream:

Hair type	Timings
All hair types	7 minutes

It is also very important to ensure the Reform Cream is left on for sufficient time to ensure the Relax Cream has been neutralised.

PLEASE NOTE:

these timings are guidelines,
only always monitor the hair
whilst developing and use
your professional judgement
to add or shorten timings
for relax cream
