

Repeat treatments

In order to maximise your business and increase your clientele, it is important that you advise your clients to rebook before they leave each appointment. It is part of our job as stylists to offer our professional recommendations to ensure that our clients are always getting the best from their treatments and to consider the health of their brow hair.

We recommend HD BrowSculpt every 6 – 8 weeks as this will allow the brow hair to recover from the

lamination process. Repeating the treatment any sooner than this may cause over processing of the brow hair which we wouldn't recommend.

When your client returns for subsequent treatments it is important to assess the hairs. You will need to determine the condition of the hair and see if any of the previous lamination results remain. From here you can adjust the timings accordingly to avoid over processing.

TOP TIP:

Advise your clients to use Brow Glue to ensure their brows stay perfectly placed all day
