

BROWSCULPT ONESTEP™ TREATMENT PROCESS

1. PREP

- Cleanse with Brow Foaming Shampoo and Brush
- Follow with Squeaky Clean to ensure brows are fully cleansed from make up, dirt, and oils
 - Blot dry

2. LAMINATE

- Apply BrowSculpt OneStep™ directly to the brows working quickly to cover both brows
 - Set your timer
 - Work the product into both brows ensuring hair is covered from root to tip
 - Clean around the brow area to avoid excess contact with skin
 - Apply Brow Fixing Film
 - As timer progresses peel back film and check how the brows are processing
- Once you are happy with the brows, remove film and thoroughly remove all product with damp cotton pads
 - Be sure to cleanse and disinfect your OneStep applicator

3. TINT

- Mix your HD Brows Brow Dye 1 part brow dye with 2 parts developer
 - Apply all over brows quickly
 - Brush through to ensure full coverage
 - Allow to develop for chosen time, checking frequently.
 - Please note, brow dye may develop faster after lamination

4. DESIGN

- Brush the brows to the desired position, ensuring they fall like dominoes rather than stand straight up
- Design the brow with extra considerations for the brow sitting higher on the face than before lamination took place

5. HAIR REMOVAL

- Always apply a barrier before hair removal in case the skin is more sensitive after lamination
 - Proceed with chosen hair removal methods
 - Apply Comfort Me to soothe area and remove wax residue

6. FINISHING & AFTERCARE

- Apply vanish to the brow to remove all residues and prepare the skin for make up
- Apply Brow Miracle Daily Conditioner throughout the brows to seal in the colour and moisture
 - Finish the brow with make up as per client consultation
