Pro X Flex	NEW	2-3 seconds	Black	Medium	All level lash artists	All	No fumes	40-70%	20-24	5g bottle / sample size 1g

Marketing information & claims (all adhesives)

All adhesives are:

- Made with clean, cosmetic grade ingredients
- Triple distilled, pure formula
- Vegan (accreditation TBC), Cruelty free and not tested on animals
- Latex free
- Paraben free
- Once cured, water-resistant, heat resistant and oil resistant
- A rich, black colour for a crisp lash line
- Fully safety assessed by an independent toxicologist
- Made in UK

Low fumes:

- All adhesives have low fumes [depending on working environment]
- **Pro X Flex** has **no fumes** [depending on working environment] - this adhesive is ideal for sensitive eyes and open eye techniques as well as lower lash application

Include a flexible ingredient:

- All adhesives contain a flexible agent in the formula
- The flexible agent allows the adhesives to form an even stronger bond that is better able to absorb any stresses on the lashes during wear (such as washing/rubbing etc.)

Essential Product Information – Pro X Rapid

PRODUCT DESCRIPTION:

Advanced, professional lash adhesive for use during application of semi-permanent lash extensions. Sets in 0.5 seconds. Thin viscosity and low fumes. Works best in 40-70% humidity and 20-24°C. For professional use only. **Recommended for experienced and confident lash artists.**

DIRECTIONS FOR USE:

- Shake well before use
- Refresh frequently throughout treatment

Product Testing Reviews & Comments

NOUVEAU®
LASHES
BELIEVE YOUR EYES

Pro X Rapid:

Well mixed, good colour. Quick and thin application. I love this adhesive with fans as the adhesive isn't too thick on the base of a fan – **Faye**

Really like the consistency, good drying time. Created good fans. Kept them fanned nice with it being so thin it was easy to use a little to much and that would close the fan, but once got use to it i enjoyed working with it – **Linzi**

AMAZING!!!! I completely fell in love with it. I felt like it was a glue I'd used for year! So easy to work with. I'd buy this tomorrow – **Rebecca**

Pro X Speed:

Love!! This is my preferred drying time. Adore this adhesive already, perfect for my lashing speed and lovely consistency, picks up the perfect amount of adhesive onto the lashes. I would absolutely purchase this adhesive – **Faye**

I liked it. Worked fine I did both classic and fanning and it worked well - **Linzi**

Perfect for less experienced artists – **Rebecca**

The colour of both is nice and black which is great and consistency is nice and thin. I found they set really fast. I'd rate it a 4.5/5 - **Jamie**

Pro X Plus:

Gives you time to adjust. Really nice adhesive for lash artists who need a little more time applying lashes. This is great for tweaking the direction of lashes and opening or adjusting fans while the adhesive sets on the lash – **Faye**

Great for students. Brilliant glue for students and less experienced artists on live models – **Rebecca**

The colour of both is nice and black which is great and consistency is nice and thin. I found they set really fast - **Jamie**

Pro X Flex:

Would be suitable for clients who are more sensitive to lash extensions – **Faye**

really liked no fume and thin consistency. with having the thinness I could work with fanning and classic. no fume was the main win on this adhesive for me. set well, worked well in the room environment – **Linzi**

LOVE LOVE LOVE. Sensitive adhesive are so hard to come by this one I was super impressed with. Loved this so much it's hard to find a good sensitive on the market - **Rebecca**
