

# Ombre Brows

- Complete thorough consultation.
- Cleanse brows with Squeaky Clean.
- Apply SOS Rescue Brow Balm to surrounding skin.
- Mix Brow Bleach and Developer and immediately apply to brows, only in the bulb and up to the body area as far into the arch as you deem necessary. After initial application, start a 10-minute timer and return to work into the roots layering bleach to give an even and generous coverage. Check every 5 minutes and repeat until you have reached a super light, bleached out blonde to act as a blank canvas or until the timer goes off.
- Apply your chosen tint mix to the tail first, being extremely careful to not touch the bleached hair with your darker colour of choice As this has not been bleached, you have time to allow it to develop.

**After lightening has taken place, be careful not to touch lightened hair with your dark tail tint mix.**

- Next, apply tint/diluter mix to the body and then the bulb of the brow, working extremely quickly. Apply bulb through to body and smudge with tail colour. Immediately remove a triangle from bulb once colour has grabbed. Check colour processing throughout brow.
- Remove with wet cotton pads once the desired colour is achieved.
- Continue with designing and shaping the brow. Remember to use the Multi-Use Powder as a barrier when waxing. After, apply a small amount of Comfort Me.
- Thread the brows \*
- Apply Vanish through the brows and surrounding skin and blot dry.
- Draw in your baseline with Brow Highlighter and blend, then apply Multi Use Powder to the surrounding skin to help conceal any redness.
- Tailor and finish your brow with your favourite HD Brows make up products and your choice of Brow Miracle Daily Conditioner or SOS Rescue Brow Balm.
- Recommend appropriate aftercare and talk them through the steps.
